

ASPEN+ 20% RENEWABLE

Special fuel for racing and standard engines

ASPEN+ 20% RENEWABLE

Special fuel with 20 % renewable content, for racing and standard engines

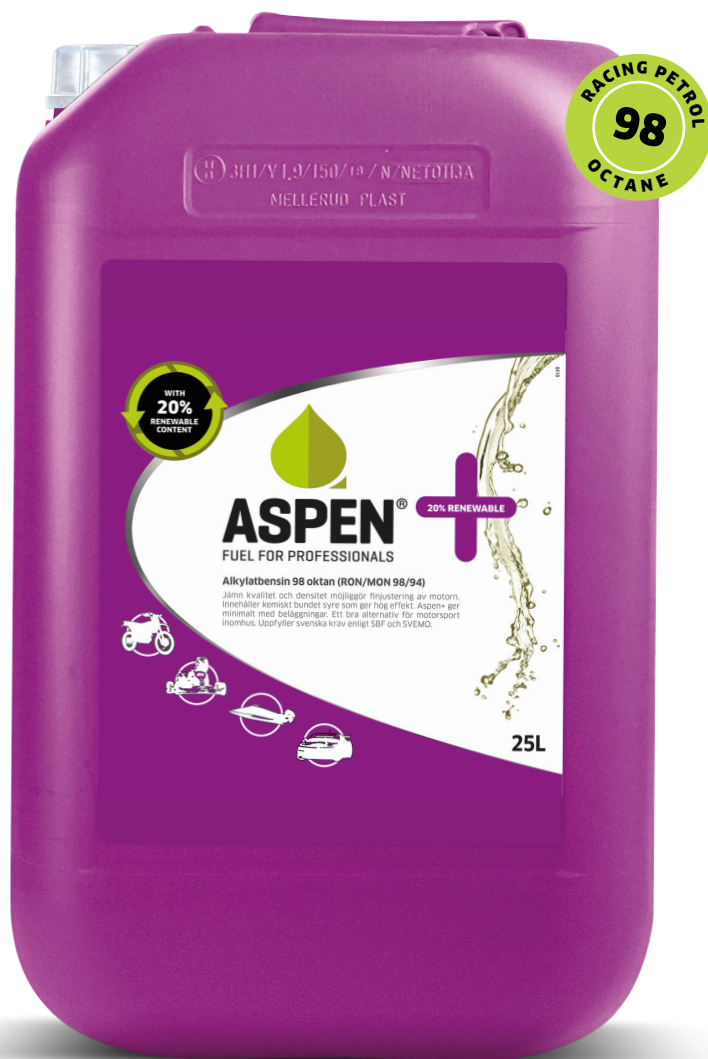

Aspen+ 20% Renewable is a high octane alkylate racing petrol developed specifically for competition cars and boats, go-karts, motorcycles and other particularly demanding applications where maximum performance is required. Aspen+ 20% Renewable provides lower environmental impact and human health risks. The renewable content is 20 percent, higher than in the existing/classic/current Aspen+. The favourable product properties are equivalent to those of the existing Aspen+.

Areas of use

Units

Available in packaging of 25L and 200L.

Product information

ASPEN+ 20% RENEWABLE TYPICAL DATA

Octane rating RON	98
Octane rating MON	94
Density (kg/m ³)	702
Oxygen content (mass-%)	3.7
Vapour pressure (kPa)	60
Sulphur (ppm)	<3
Aromatics (vol-%)	<0,4
Benzene (mass-%)	<0,08
Olefins (vol-%)	<0,2

Aspen+ racing approvals:

- Approved according to SBF and SVEMO.

Environmental and health advantages:

- Less hazardous petrol vapours.
- Virtually free from benzene, toluene, sulphur and olefins.
- A great alternative for indoor motorsports.

Technical advantages:

- Always maintains high and even quality.
- Reduces the risk of engine knocking.
- Reduces engine wear, giving an increased longevity.
- Gives a cleaner engine with fewer deposits.
- Does not deteriorate during long-term storage (3-5 years).
- Reduces the risk of vapour lock.
