

ASPEN+

Special fuel for racing and standard engines

 **ASPEN®**
FUEL FOR PROFESSIONALS

ASPEN+

Special fuel for racing and standard engines

Aspen+ is a high octane alkylate racing petrol developed specifically for competition cars and boats, go-karts, motorcycles and other particularly demanding applications where maximum performance is required. Aspen+ provides lower environmental impact and human health risks.

Areas of use

Units

Available in packaging of 25L and 200L

Product information

ASPEN+ TYPICAL DATA

Octane rating RON	98
Octane rating MON	94
Vapour pressure (kPa)	60
Sulphur (ppm)	<3
Aromatic content (vol %)	<0,2
Benzene content (mass %)	<0,1
Olefin content (vol %)	<0,2
Density (kg/m ³)	700
Oxygen content (mass %)	3,0

Health- and environmental impact

Knocking resistance at low engine speeds
Knocking resistance at high engine speeds.
High vapour pressure leads to more petrol vapour and problems in hot conditions.
Hazardous to health and the environment.
Very harmful to health & the environment, can cause nerve damage, headaches, fatigue and nausea. Benzene can cause blood cancer (leukaemia).
Cracked heavy fuel oil is harmful to health and the environment. Leads to operating problems, reduces storage stability.

Aspen+ racing approvals:

- Approved according to SBF and SVEMO.

Environmental and health advantages:

- Less hazardous petrol vapours.
- Virtually free from benzene, toluene, sulphur and olefins.
- A great alternative for indoor motorsports.

Technical advantages:

- Always maintains high and even quality.
- Reduces the risk of engine knocking.
- Reduces engine wear, giving an increased longevity.
- Gives a cleaner engine with fewer deposits.
- Does not deteriorate during long-term storage (3–5 years).
- Reduces the risk of vapour lock.
