

ASPEN R

Special fuel for racing engines

 **ASPEN®**
FUEL FOR PROFESSIONALS

ASPEN R

Special fuel for racing engines

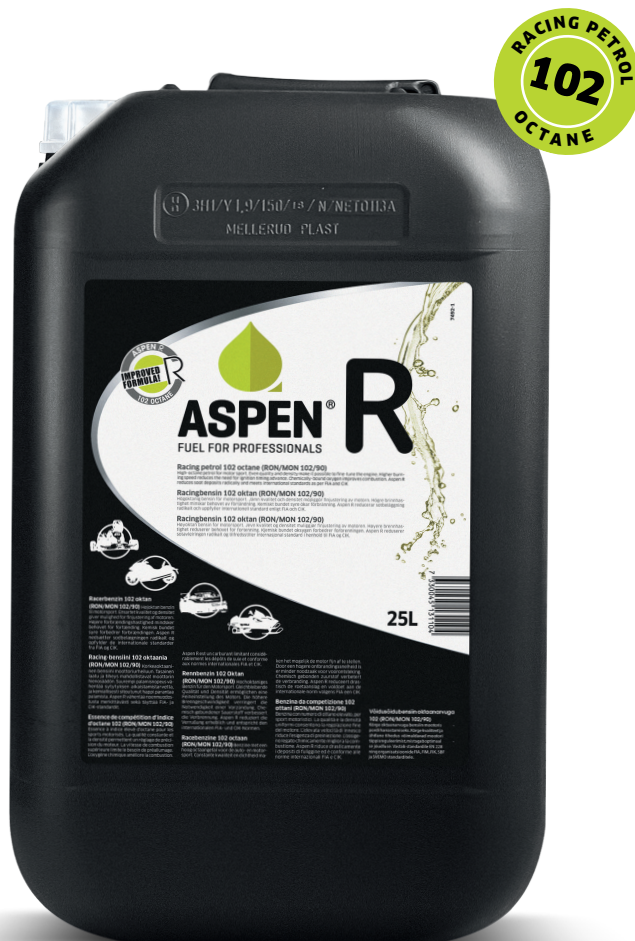

Aspen R is a racing petrol providing superior and consistent quality making it easier to optimize the engine's ignition and fuel systems. The result is great combustion, resulting in high performance. Aspen R is developed for all types of motorsport where the user wants to get the most power from the fuel.

Areas of use

Units

Available in packaging of 25L and 200L

Product information

ASPEN R TYPICAL DATA

Octane rating RON	102
Octane rating MON	90
Vapour pressure (kPa)	63
Sulphur (ppm)	< 3
Benzene content (mass %)	<0,1
Oxygen content (mass %)	2,5
Density (kg/m ³)	750

Health- and environmental impact

Knocking resistance at low engine speeds.
Knocking resistance at high engine speeds.
High vapour pressure leads to more petrol vapour and problems in hot conditions.
Hazardous to health and the environment.
Benzene can cause blood cancer (leukaemia).

Aspen R approvals:

- Approved according to standards EN 228, SBF and SVEMO.

Environmental and health advantages:

- Less hazardous petrol vapours.
- Virtually free from benzene and sulphur.

Technical advantages:

- High combustion speed.
- Always maintains high and even quality.
- Reduces the risk of engine knocking.
- Reduces engine wear and gives an increased longevity.
- New, more robust packaging for decreased risk of evaporation.
